

FORESTS	OCEANS	POPULATION GROWTH	AIR
Why are forests important for the planet and for humans?	In what ways are the oceans important for human survival?	How fast is the human population growing?	Where can you find the best/worst air quality? Why is that?
Which major forests are the most important for the survival of the planet and why?	What impact has climate change had on the oceans and what might this mean for humans in the future?	What could this mean for the resources humanity needs to survive and thrive?	What factors affect the quality of the air?
In what ways has humanity impacted on forests?	In what ways are humans affecting the oceans?	In what ways does an increase in world population affect the environment?	What effects does air pollution have on the environment and health?

## Presentation observation sheet

### Topic 1, Section A, exercise 9

Watch your team members' presentations and fill in your observation sheet.
